

YOSEMITE

A stylized, flat-design illustration of a Yosemite landscape. The top half features rolling green hills under a pale yellow sky. A winding, light-colored path or river flows through the middle ground. In the foreground, there are dark, jagged rock formations and a small waterfall on the left. The overall color palette is muted, consisting of greens, yellows, and dark blues.

NATURE'S REST

Nature at its Best

Sleep Well. Rise Restored.

Nature & Comfort in Harmony

We believe in the restorative power of nature and that harmonizing health, comfort, and sleep makes our lives better. So we developed an environmentally conscious mattress that doesn't compromise on comfort.

We're for those who believe natural is better. They believe a more natural life leads to a happier, healthier and better quality of life. They are a conscious consumer who considers the social, environmental, ecological and political impact of their actions.

Yosemite National Park

A Yosemite is a national park in the Sierra Nevada Mountains of Northern California, known for its massive granite cliffs, waterfalls, and spectacular views. As the third most popular National Park in the country, it receives over five million visitors per year.

How was Yosemite National Park Created

Yosemite was officially made into a National Park on October 1, 1890, but many different people and events were necessary to get Yosemite on the map.

1851

The Mariposa Battalion, a California militia group, first called the area Yosemite, named after a tribe of Native American.

1864

President Abraham Lincoln signed the Yosemite Grant, putting the land under the protection of the State of California.

1890

Yosemite became the third official National Park in America, following Yellowstone and Mackinac.

1903

John Muir took President Theodore Roosevelt on a camping trip to Yosemite Valley. John Muir was a nationalist and professional explorer. His writing and journals helped to get Yosemite officially designated as a national park and continue to inspire people today.

1906

Yosemite expanded to include the land that was formerly under the control of the state of California from the Yosemite Grant. This included many of the most popular sites in the park today such as Yosemite Valley and the Mariposa Grove.

1916

The National Park Service was created to protect and maintain the National Parks.

National parks are chosen for their natural beauty, unique geological features, and unusual ecosystems. Yosemite is 1169 square miles of mountains, cliffs, waterfalls, forests, valleys, lakes, rivers and more.

Sleep Well. Rise Restored.

We build an environmentally conscious mattress without compromising on comfort.

Refined

Designed to be natural in all the right ways. We are devoted to the details, making sure our product is the best for your body, your home, and our natural environment.

-  • **Linen and Talalay Latex** are hypoallergenic, resistant to insects, and microbial growth.

Restorative

Wake up renewed within the comfort of nature. We create buoyant, body conforming support in a variety of options designed to be responsive to you.

-  • **Talalay Latex and Linen** are breathable.
- **Talalay Latex** is up to 7 times more breathable than other foams.
-  • **Talalay Latex** delivers a unique buoyant quality which relaxes muscles and relieves tension, lifting away the pressures of the day while you sleep.

Responsible

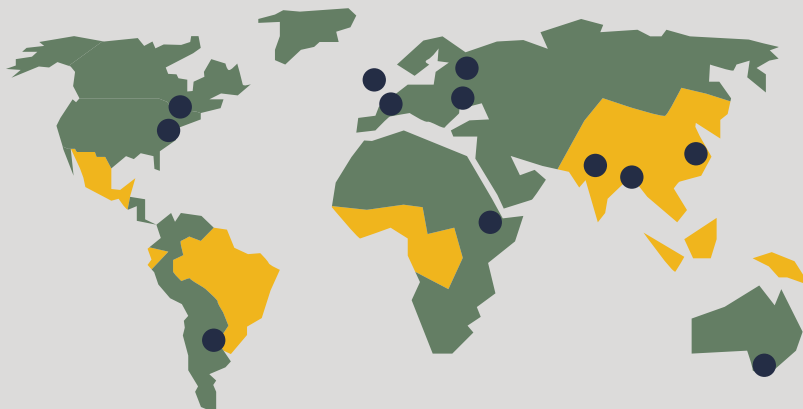

Sustainable for our planet and your bedroom. Our proven, natural construction delivers consistently conforming comfort over time.

Your Bedroom

-  • **Linen fabric** is durable and lightweight
- **Talalay Latex** is the most resilient material available in a mattress.

Our Planet

-  • **Linen and Talalay Latex** are Biodegradable
-  • **Cultivation of Linen** uses up to 20% less energy and water than other comparable fabrics.
-  • **Rubber Trees** absorb carbon dioxide from the atmosphere, helping reduce greenhouse gases.

 Linen, which is made from the Flax plant, is technically a vegetable and the oldest cultivated plant in human history.

 Talalay Latex, which is made from the sap of the rubber tree and is used in Airplane tires.
